

Schlumberger Selects Google Cloud for its Enterprise-Wide SAP Migration and Modernization

Google Cloud will support Schlumberger's IT services and infrastructure, providing higher levels of resiliency and scalability while reducing costs and downtime

Sunnyvale, Calif., April 29, 2021—Schlumberger and Google Cloud today announced a new partnership to accelerate and modernize Schlumberger's transition to SAP in the cloud. Under this new partnership, Google Cloud becomes Schlumberger's cloud provider for critical IT services and infrastructure underpinning its finance, supply chain, and human resources applications from SAP.

"Maintaining the highest levels of uptime while providing seamless access to IT services for employees at locations around the world is critical to our business at Schlumberger," said Sebastien Lehnerr, CIO at Schlumberger. "We have enterprise-class requirements for highly-available and resilient SAP infrastructure, and with that in mind, we are partnering with Google Cloud as our cloud provider of choice for SAP."

"Enabling SAP on Google Cloud at scale, with cutting-edge infrastructure, provides Schlumberger with the agile environment needed to quickly respond to its ever-changing business demands," said Rob Enslin, President at Google Cloud. "Enterprises are increasingly turning to Google Cloud for core compute workloads like SAP, and we're committed to providing them with a future-proof cloud platform on which to run their most critical workloads."

Under this initiative, Schlumberger has deployed more than two hundred applications onto Google Cloud, including SAP systems for ERP, Supply Chain Management, Human Capital Management, Process Orchestration, Manufacturing Integration & Intelligence, Business Planning & Consolidation and more.

To build for the future, Schlumberger needed a trusted cloud platform. Today, Google Cloud's global, reliable, and highly-performant network ensures availability and speedy delivery of key IT services to Schlumberger employees around the world. The company is also benefiting from Google Cloud's live migration capabilities, ensuring zero downtime during updates and changes to its underlying infrastructure.
