BNY Collaborates with Google Cloud to Advance its Eliza AI Platform with Gemini Enterprise

Gemini Enterprise to help accelerate deep research capabilities for the bank's global workforce

SUNNYVALE, Calif. and NEW YORK, Dec. 8, 2025 /[PRNewswire](#)/ -- BNY (NYSE: BK) and Google Cloud today announced the integration of Gemini Enterprise – Google Cloud's agentic AI platform powered by its most advanced models – into BNY's enterprise AI platform, Eliza.

This strategic integration is helping advance Eliza's agentic deep research capabilities for market analysis and equipping the company's global workforce with access to multimodal features.

BNY's employees can now build AI agents to quickly process, synthesize, and analyze extensive financial reports, relevant data, and historical trends to extract insights and navigate complex financial information more efficiently. The integration is also helping automate routine, data-intensive tasks.

"At BNY, our AI strategy is clear: AI for everyone, everywhere and everything," said Sarthak Pattanaik, chief data & AI officer, BNY. "By integrating with Gemini Enterprise, we continue to advance the capabilities embedded into Eliza, deepening the platform's agentic research, integrating data sources more seamlessly and securely and elevating the user experience. The integration underscores our goal to create capacity for our people to embed deeper analysis and strategic insights, adding value in their everyday delivery for clients."

"Our collaboration with BNY is at the forefront of the agentic era in finance," said Rohit Bhat, general manager and managing director of Financial Services, Google Cloud. "By combining the powerful reasoning of Gemini Enterprise with BNY's deep financial markets expertise, BNY is proving that the future of banking lies in the seamless integration of human expertise and advanced computational agents."

BNY has been a long-time user of Google Cloud's AI capabilities and continues to leverage Google's newest models, including Gemini 3 and Veo 3, to enable diverse AI capabilities across its enterprise AI platform.

About Google Cloud

Google Cloud is the new way to the cloud, providing AI, infrastructure, developer, data, security, and collaboration tools built for today and tomorrow. Google Cloud offers a powerful, fully integrated and optimized AI stack with its own planet-scale infrastructure, custom-built chips, generative AI models and development platform, as well as AI-powered applications, to help organizations transform. Customers in more than 200 countries and territories turn to Google Cloud as their trusted technology partner.
